

## Online Report for 2021

The website has been completely revamped this year, moving to the Wordpress platform using a different ISP in March. The cost of this is about £30 pa, so roughly the same as previously, with a small migration cost.

This change has allowed for a redesign, which I hope you all approve, and numerous improvements to be made, amongst which we now have a good news feed system, displaying the last three items on almost all pages in addition to our SECF event diary dates (now showing some dates for 2022!). There's also a new page which will hold the details of all the Consultations we're undertaking - hopefully some will appear by the time you read this.

Overall, these changes are designed to make it easier for you to keep up to date with what we're doing. Finally, the new Club News page shows news items from many of the clubs in our area. It and our News are available as RSS feeds for those techies amongst you.

Our Facebook presence has also been enhanced because of the new website, with all our news items and postings from various clubs in our Federation also appearing on our Facebook page. So this is another easy way of keeping up to date with what's going on in our area. However, it's clear that not so many people are looking at our page currently. So please like us!

Finally, I'd like to thank John Low for relieving me of having to update the website for the League results and everybody who's providing updates to contact details etc.
